Disclaimer and compliance statement

This presentation has been prepared by Hamelin Gold Limited (“Hamelin”). The information contained in this presentation is a professional opinion only and is given in good faith. Certain information in this document has been derived from third parties and though Hamelin has no reason to believe that it is not accurate, reliable or complete, it has not been independently audited or verified by Hamelin.

Any forward-looking statements included in this document involve subjective judgement and analysis and are subject to uncertainties, risks and contingencies, many of which are outside the control of, and maybe unknown to Hamelin. In particular, they speak only as of the date of this document, they assume the success of Hamelin’s strategies, and they are subject to significant regulatory, business, competitive and economic uncertainties and risks. Actual future events may vary materially from the forward looking statements and the assumptions on which the forward looking statements are based. Recipients of this document (“Recipients”) are cautioned to not place undue reliance on such forward-looking statements.

Hamelin makes no representation or warranty as to the accuracy, reliability or completeness of information in this document and does not take responsibility for updating any information or correcting any error or omission which may become apparent after this document has been issued.

To the extent permitted by law, Hamelin and its officers, employees, related bodies corporate and agents (“Agents”) disclaim all liability, direct, indirect or consequential (and whether or not arising out of the negligence, default or lack of care of Hamelin and/or any of its Agents) for any loss or damage suffered by a Recipient or other persons arising out of, or in connection with, any use or reliance on this presentation or information.

The information in this report that relates to Exploration Results is based on information compiled by Mr. Peter Bewick who is a Member of the Australasian Institute of Mining and Metallurgy. Mr. Bewick hold shares and options in Hamelin. He is a full time employee of Hamelin and has sufficient experience which is relevant to the style of mineralisation under consideration to qualify as a Competent Person as defined in the 2012 Edition of the 'Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Bewick consents to the inclusion in the report of the matters based on the information compiled by him, in the form and context in which it appears.

Hamelin confirms that it is not aware of any new information or data that materially affects the information in the relevant ASX releases and the form and context of the announcement has not materially changed. Hamelin confirms that the form and context in which the Competent Person’s findings are presented have not been materially modified from the original market announcements.

¹ Refer to ASX Announcements 9 February 2026, 20 July 2026 and 3 August 2026

This announcement has been approved for release by the Board of Hamelin.

Day Dawn Project

- 10km NW of the +20Moz Telfer gold-copper mine – Paterson Province WA
- Initial RC program completed, 28 holes for ~2,400 metres
- Outstanding shallow, high- grade Aurora Lodes including¹:
 - 3m @ 93.4 g/t Au from 9m
 - 4m @ 21.0 g/t Au from 27m
 - 3m @ 18.3 g/t Au from 35m
 - 2m @ 12.4 g/t Au from 149m
- Reef style gold mineralisation emerging
- Phase 2 RC in progress (+3,000m)
- EIS co-funded diamond drilling Oct 2026

(¹refer to ASX Announcements 20 July 2026 and 3 August 2026)

*Day Dawn Project – Tenement Outline over Bing Sat imagery (GDA94 z51)
with solid geology interpretation overlay*

Day Dawn Project – Aurora Lode

Aurora / Altus Prospect – Drill collar location on Bing Sat imagery

Aurora Lodes

- Steeply dipping, northeast trending high-grade gold lodes
- 2-3m in width, averaging 10-20g/t Au
- Emergence of conformable, flat lying reef-style gold mineralisation
- Lodes plunge to the southwest and appear as an en-echelon set of 'feeder like' structures
- System is sparsely drilled and remains open down plunge

Aurora Lode¹ – Section B

Aurora Lodes

- What is the significance of the Aurora Lodes and what do these type of lodes represent?

Aurora Lode¹ – Section F

Telfer Geology Plan

Telfer Geology Section

Interpreted geological cross section across the Telfer Gold Deposit (Wilson et al 2020 SEG Sp Publ #23)

Day Dawn System

- Exploration model based on Telfer deposit geology and mineralisation style
- Aurora-type lodes at Day Dawn sit stratigraphically higher than the bulk of the Telfer mineralisation
- The mineral system remains poorly tested at Day Dawn
- EIS co-funded diamond drilling to test for high grade reef style mineralisation in the interpreted 'E-Reef' and 'M-Reef' positions

Day Dawn Project - Geological and Mineralisation Model

Upcoming News from Day Dawn

- Phase 2 RC drill program in progress (+3,000m)
 - Extend Aurora Lode up and down plunge
 - Test for additional parallel lodes and extensions to the mineralised reefs
 - Define surface footprint of Day Dawn gold system
- EIS co-funded diamond drilling to test for a 'Telfer-style' system at depth (1,200 – 1,500m) commencing Oct 2026

Venus Project - Yilgarn

- Large tenement position adjacent to Ramelius and Westgold gold operations
- Within the Murchison district between Mt Magnet and Meekatharra
- Neighbour to Caprice's Island project
- Lake Austin covers the clear extensions of known gold corridors
- High grade gold at Magellan
 - 5 metres at 2.95g/t Au from 100 metres to EOH

(refer to ASX Announcement 27 January 2026)

Venus Project – Regional location plan and key tenement holders (GDA94 z50)

Venus Project

- Detailed (50m spaced) airborne magnetics and radiometric survey completed
- Priority targets defined following review of aeromagnetic and geochemical surveys
- Heritage survey completed over southern targets
- Initial 130 hole, lake aircore program planned for H2 2026 designed to:
 - identify gold anomalism
 - confirm geological interpretation
 - test cover depth

Venus Project – Summary plan and 2026 Targets (GDA94 z51)

West Tanami: 900km² Project in a Tier 1 Goldfield

West Tanami

- Use of innovative surface geochemistry, airborne EM and regional aircore drilling to screen for significant mineral systems
- Five large scale mineral systems defined; Sultan, Mojave, Camel, Hutch's and Fremlins
- Bedrock gold mineralisation intersected at Jazz and Fremlins South in 2025
- Focus on search for high grade gold shoots within deposit scale gold footprints

West Tanami Project – Maximum gold in hole¹ (+0.1g/t Au), key prospects on magnetics (GDA94 z52)

Upcoming Programs

- RC drilling to define high-grade gold lodes at Day Dawn, Paterson Province
- Diamond drilling at Day Dawn to test for a 'Telfer-style' system at depth
- Initial drill test of priority targets at the Venus Project, Yilgarn Province
- Evaluate large scale gold systems for high-grade shoots in the West Tanami, Tanami Province
- Continue to build the WA gold exploration portfolio
